

# BEAUTY REFLECTOR +

Codes:  
PROBEAU | RIBEAU  
P-bayonet      V-bayonet

## Characteristics:

The white reflecting surface produces a nuanced rendition of skin with a correct tonal range. The honeycomb filter lets light emerge in a straight line and holds stray radiation back giving a soft shadow definition. The beauty reflector is an excellent light shaping tool for portraiture- and beauty photography, it produces smooth skin high-lights and well balanced hair-reflections.
